

[Cefic]
Declaration of Support for the ICCA Responsible Care® Global Charter

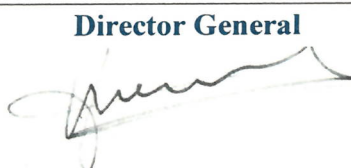

[Cefic, the Federation of European Chemicals Manufacturers and National Chemicals Associations is committed to implementing the global chemical industry's Responsible Care® environmental, health, safety and security performance initiative, required by the ICCA Global Charter, and actively strengthening Responsible Care® worldwide.

Our Federation expects our members (companies and national associations), as well as our partners along the value chain, to safely manage the chemical products using a risk-based and life-cycle oriented approach, promote pollution prevention, minimization of waste and conservation of energy and other critical resources at every stage of the chemical product life cycle, while cooperating with national and European authorities and the community in accordance with the six commitments of the Responsible Care® Global Charter .

By demonstrating this commitment, our Federation is playing its part in actively safeguarding people and our environment, demonstrating our contribution to the UN Sustainable Development Goals, and enhancing our collective quality of life.
